🧺 Basket Quest!!!

🎮 Game Overview:

Basket Quest!!! is a classic-style arcade game and fruit-catching challenge where you control a basket to catch as many falling Bunch of fruits as possible. Stay alert, move fast, and aim for a high score before you run out of lives!

Game Instructions:

👤 Players

- Single-player

🕹️ Controls

Action	Key
Move Left	← (Left Arrow)
Move Right	→ (Right Arrow)
Exit Game	Esc
Restart Game	Enter (after Game Over)

🎯 Objective

- Catch as many Bunch of fruits as you can with the basket.
- Avoid missing fruits— as if you miss 3 fruits, the game ends!

📜 Rules for playing the game

1. Use the **left and right arrow keys** to move your basket across the bottom of the screen.
2. Bunch of Fruits will fall from the **top** at increasing speed.
3. Catch a Bunch of fruit to earn **1 point**.
4. Missed Bunch of fruits will reduce your lives by 1.
5. You start with **3 lives**.
6. When all lives are lost, the **Game Over** screen will appear.
7. Press **Enter** to restart the game with score and lives reset.

Command: In Terminal (to run the code)

```
g++ FruitCatcher.cpp Fruit.cpp Basket.cpp -o fruitcatcher -lsfml-graphics -lsfml-window -lsfml-system -lsfml-audio

./fruitcatcher
```
